

ENVIRONMENTAL POLICY

1. Armorgard Security Products is committed to protecting the environment by proactively ensuring consistent compliance with existing environmental regulations, encouraging pollution prevention, and striving towards continual improvement.

Armorgard Security Products endeavours to go beyond minimum environmental compliance with regulatory standards to achieve a standard of excellence in environmental management practices, as an integral part of its total quality management program.

2. To comply with applicable state and local environmental regulatory requirements, as a minimum, and achieve higher standards through continuous improvement.
3. To ensure that all employees and contractors understand and follow applicable environmental, health and safety policies; to improve awareness and understanding of environmental regulations, standards, guidelines and codes of practices.
4. To develop and continuously improve operations for activities, products and services in order to reduce waste generations and emissions to air, water and land.
5. To use energy responsibly and efficiently in all activities.
6. To recycle waste materials where feasible.
7. To comply with customer environmental standards.
8. To emphasize individual responsibility for environmental health and safety by all employees and at all levels of management; to encourage employee participation in providing suggestions for improvements to environmental health and safety.
9. To promote the use of environmentally responsible products where feasible; to dispose of waste efficiently and as responsibly as possible.
10. To periodically review environmental
